ATC	Medication code as per the ATC coding system	#	Refer to ATC coding system (https://www.whocc.no/atc_ddd_index/)	
Baseline_MedPres	Medication prescribed prior to randomization	0	No	These variables reflect medication prescription status in the calendar of the annual visit (due date). This data is only applicable to ASPREE time frame (2017 and earlier). In this section, a commentary code of 19 (insufficient data to derive) indicates that an indeterminate start year was recorded in the database and hence calculation of medication use by year is not possible for the year annotated with a 19.
