Six-Item Screener to Identify Cognition Impairment

CRF 1.0

Script: I would like to ask you some questions that use your memory. I am going to name 3 objects. Please wait until I say all 3 words, then you repeat them. Remember what the 3 objects are because I am going to ask you to name them again later.

Please repeat these words for me: APPLE—TABLE—PENNY.
(Interviewer may repeat words 3 times if necessary.)

Did the participant correctly repeat all three objects? repeat_sixs

-9
1 Yes
0 No
-6 Permanently Missing

[▼]

Now I'm going to ask you a few questions.

1. What is the year?   year_sixs
-9
0 Correct
1 Incorrect
-6 Permanently Missing

[▼]

2. What is the month?   mon_sixs
-9
0 Correct
1 Incorrect
-6 Permanently Missing

[▼]

3. What is the day of the week?   week_sixs
-9
0 Correct
1 Incorrect
-6 Permanently Missing

[▼]

Use an additional set of questions, such as verifying name, address and phone numbers as a distracter. Allow 3 minutes to pass before asking for recall.

What were the three objects I asked you to remember?

4. APPLE   ob1_sixs
-9
0 Correct
1 Incorrect
-6 Permanently Missing

[▼]

5. TABLE   ob2_sixs
-9
0 Correct
1 Incorrect
-6 Permanently Missing

[dropdown ▼]

6. PENNY　　　　　ob3_sixs

-9
0　Correct
1　Incorrect
-6　Permanently Missing

[dropdown ▼]

SCORING:
Total the number of items <u>missed</u> (sum number of
INCORRECT's check)

A score of <u>4 or more</u> indicates a need for administration of
questionnaires with the participant's proxy.
