Ankle Brachial Index (ABI) Measurement Form

Pre-interview instructions for the participant:

“Please remove your shoes and stockings so that your ankles are bare to mid-calf. Nylon stockings must be removed. Long sleeves should be rolled up several inches above the elbows, or if this is impossible, please remove your shirt and we can cover you up with a hospital gown.

For the five minutes before we start the ABI measurements, we ask you to please rest quietly without talking, laying as flat and still as possible on the bed.

We will not talk during the ABI measurement because talking can affect the pressure readings. However, we will not be talking to you about the pressure readings during the examination.

In you are in pain or need the test to stop, please let me know.”

Measurement #1	
1. Right Arm Pressure	
2. Right PT	
3. Left PT	
4. Left Arm Pressure	
Measurement #2	
5. Left Arm Pressure	
6. Left PT	
7. Right PT	
8. Right Arm Pressure	
ABI	
9. Left Leg ABI	
10. Right Leg ABI	
11. ABI
