WOMAC© subscales

There are three WOMAC© subscales: pain, stiffness and disability. The time period covered by the subscales is the "past 30 days." Subscale scores are the sum of individual item scores for all items in the subscale.

Knee pain

The individual items in the pain subscale are:

Activity	Variable (right knee)	Variable (left knee)
Walking	**G2Q1KR**	**G2Q1KL**
Up stairs	**G2UPR**	**G2UPL**
Down stairs	**G2DOWNR**	**G2DOWNL**
Stairs (calculated)	**G2Q2KR**	**G2Q2KL**
In bed	**G2Q3KR**	**G2Q3KL**
Sit or lie down	**G2Q4KR**	**G2Q4KL**
Standing	**G2Q5KR**	**G2Q5KL**

Each knee pain item is scored on a 5-point scale:
0 = None
1 = Mild
2 = Moderate
3 = Severe
4 = Extreme
5 = Don't do*
.M = Missing

*The following variables have the 5 (don't do) scoring option: V2UPR, V2UPL, V2DOWNR, and V2DOWNL. "Don't do" is set to missing.

The pain subscale scores are calculated for the right and left knee separately. The pain subscale possible score range is 0-20.

Score	Variable (right knee)	Variable (left knee)
Pain subscale scores	**G2WOPNKR**	**G2WOPNKL**

03-17-10

Knee stiffness

The individual items in the stiffness subscale are:

Activity	Variable (right knee)	Variable (left knee)
In morning	**G2Q6KR**	**G2Q6KL**
Later in day	**G2Q7KR**	**G2Q7KL**

Each knee stiffness item is scored with the same scale used for knee pain, except the "5" scoring option (see previous page) is not available.

The stiffness subscale scores are calculated for the right and left knee separately. The stiffness subscale possible score range is 0-8.
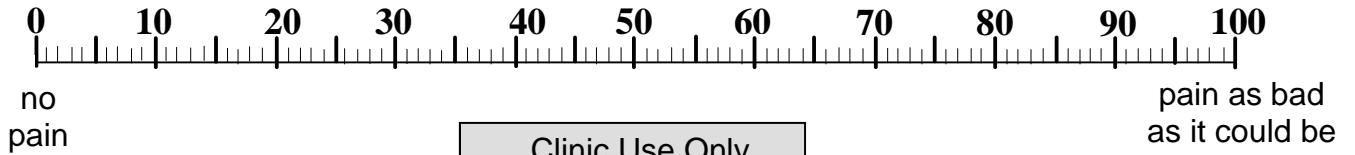

Score	Variable (right knee)	Variable (left knee)
Stiffness subscale scores	**G2WOSTKR**	**G2WOSTKL**
