Demographics

General

Form Type: Documentation

LEGEND:

Raw form variable names are located next to the question they represent and do not have a border around the variable name.

Calculated variable names are derived from other variables and have a border around the variable name. The calculated variables names are located in close proximity to the questions from which they were derived.

Some of the questions and measurements on these forms are not being released, and therefore no variable name is provided for them.

V2DAYS

date.

is calculated by subtracting enrollment date from current visit

V2AGE

is calculated by subtracting birth date from current visit date.
