Say: "Now I am going to say more numbers. Please listen carefully. When I stop, I want you to say them backwards-the last number first and the first number last. For example, if I say 1-2-3, you would say 3-2-1."

Instructions: Read the numbers at a rate of one per second. Proceed with task if correct response is given. If incorrect, provide additional assistance until participant understands the task. Administer 2nd trial even if 1st trial is incorrect. Discontinue if both trials fail.
