DOCUMENTATION FOR THE PUBLIC-USE SWAN VISIT 10 DATASET

1. Who is included in the public use dataset:

The dataset contains follow-up visit 10 information for the subset of the original cohort still participating in the SWAN longitudinal study from the seven clinical sites. The sites include Boston, MA, Pittsburgh, PA, Oakland and Los Angeles, CA, Detroit, MI, and Chicago, IL. Data was not collected from New Jersey for this visit.

Difference from the prior release of the Visit 10 archive dataset (nia102018): The calibrated cardiovascular measure C-reactive protein (CRPRESU10) assay and flag variable were added. CRP was calibrated due to changes in labs and machines over time during the study.

NOTE: A detailed description of cardiovascular lab methods and calibrations by visit can be found in the document entitled *SWAN Cardiovascular Laboratories and Methods*.

2. How this codebook is constructed:

Following this documentation section are copies of each of the questionnaires that were used at visit 10. A list of additional variables is also provided. The questionnaires include the variables available for public use next to the question in bold red uppercase underlined letters. Those variables not available for public use have a # before the variable and are in blue. Any special notes are indicated with footnotes at the bottom of the page.

The assigned participant ID has been replaced with a randomly generated ARCHID in order to protect participant privacy. The *baseline* interview date is denoted as day 0 and is used as the basis for all other dates. All other questionnaires or data collected that have a date attached have been converted to the number of days from the baseline interview. For example, if the Visit 10 Self-Administered Questionnaire Part A was collected 10 years after the baseline interview, the day for the Self-Administered Part A would be day 3,650 and the Baseline Interview would be day 0.

All variables for visit 10 have a 10 at the end of the variable name.

3. Missing data coding:

Original missing codes (-1: not applicable, -7: refused, -8: don't know, -9: missing) have been recoded to SAS missing codes (.B: not applicable, .D: refused, .C: don't know, and .A: missing).

4. Ways this data can be used and additional notes

Interview Questionnaire

- In general, most 'Other, specify' text fields are not included in the dataset.
- Age (AGE10) was calculated from date of birth to when the interview form was completed, and is rounded to the next lowest integer.
- CES-D scores can be created from the questions in F.4.
- A perceived stress score can be created from questions in F.3.
- A social support score can be calculated from the questions in F.2a-d after recoding them from a 1-5 range to a 0-4 range.
- In depth complementary and alternative medicine questions are asked in questions C.1 through C.21.
- Several forms of the interview could be administered, depending on the amount of time available with the participant. This visit also implemented the final menstrual period form, which contains some of the same variables as are found in the interview. The flag FORMINT10 was set to indicate which version of the interview was administered:
 - a) FUI indicates participants that completed the full interview.
 - b) AINT (Abbreviated FU interview) (130 participants) completed an abbreviated interview in combination with either an abbreviated or full Self-Administered Part A form.
 - c) AFUI (Abbreviated Plus FU Interview) (16 participants) completed an abbreviated form of the interview that comprised key questions from the interview and Self-Administered Questionnaire – Part A.
 - d) FMP (Final Menstrual Period Form) (2 participant) – could be filled in at the clinic, home or by mail.
 - e) The mail interview was discontinued with this visit.

Self-Administered Questionnaire Part A

The participant could fill in a full Self-Administered Questionnaire, Part A, a phone interview, or an abbreviated version as described above (AINT or AFUI). The flag FORMSAA10 delineates those who did the full questionnaire (SAA) from the 110 participants who did the abbreviated questionnaire (AIN), the 4 that did the phone interview (PAT) and the 16 that did the abbreviated plus follow-up interview (AFU).

- The income question (F.1) was omitted due to small cell sizes.
- Current smoking is defined as anyone who answered 'yes' to question B.9 (SMOKERE10) and an answer greater than 0 for B.9a (AVGCIGDA10).
- Positive and Negative Affect Schedule (PANAS) Scores can be derived from questions H.1.a through H.1.t. A subset of the participants answered the Japanese version, which has 22 culturally appropriate items rather than the 20 items asked on the English version. There is no direct correlation between the two versions, so all Japanese items have been set to missing. In addition, question H.1.b has been set to missing because 'disinterested' was on the form, but the correct PANAS term is 'distressed.' It is suggested that the raw 9 item negative affect score, when multiplied by 1.112, can be made comparable to the positive affect score and the outcomes found in the literature.
- SF-36 scores for all eight of the subscales can be derived according to the SF-36 User's Manual. Responses may need to be reversed where necessary so that all items are positively scored. Thus for each scale, a higher value indicates better functioning. The Bodily Pain Score is calculated from questions B.20 and B.21. Item recoding depends on whether both questions were answered or one of the items has missing data. After recoding, all the items are positively scored so that a higher score indicates less pain. The Vitality Score is calculated from questions B.22.a, .e, .g and .i. Questions B.22.a and B.22.e should be reversed so that all items are positively scored; for the resulting index a higher score indicates greater energy (and less fatigue). The Social Functioning Score is calculated using questions B.19 and B.23. Question B.19 is reversed so that all items are positively scored; for the resulting index a higher score indicates better social functioning. The Role-Emotional Score is calculated using questions B.18a-c. All items are positively scored, so a higher score indicates better role-emotional functioning. The Mental Health Score is calculated from questions B.22.b - .d, B.22.f and B.22.h. Questions B.22.d and B.22.h were reversed so that all items are positively scored; for the resulting index a higher score indicates participant feels peaceful, happy and calm all of the time. The General Health Score is calculated from questions B.1. and B.24.a-d. Questions B.1, B.24.b and B.24.d were reversed so that all items are positively scored; for the resulting index a higher score indicates participant believes personal health is excellent. The Physical Functioning Scores are calculated from questions B.16.a-j. All items are positively scored; for the resulting index a higher score indicates ability to perform all types of physical activities including the most vigorous without limitations due to health. The Role-Physical Score is calculated from question B.17a-d. All four questions were reversed so that all items are positively scored; for the resulting index a higher score indicates no problems with work or other daily activities as a result of physical health.
- Life Events can be calculated from questions E.1.a-r. A total number of life events can be calculated, a score that totals the number of 'very upsetting' stressful life events, and a categorical event score can be calculated where 0 = no very upsetting/stressful life events, 1 = one very upsetting/stressful life event, and 2 = two or more very upsetting/stressful life events.
- The flag FLGSAAV10 is set for the one participant who completed the questionnaire after the 01/31/2008 cutoff.

Self-Administered Questionnaire Part B

- The flag FLGSABV10 is set for the 1 participant who completed the questionnaire after the 01/31/2008 cutoff.
- There are inconsistencies with the answering of this questionnaire, but due to the nature of the form, the interviewers did not contact the participant to clarify the information.

Physical Measures

- In addition to the variables on the form, BMI10 was also calculated as weight in kilograms divided by the square of height in meters.
- Self-reported weight and height were collected, along with the reason for using self-reported measures.
-

Cognitive Function Form

- Individual and summary scores are available for the following tests: East Boston Memory Test (both the immediate and delayed recall of a story), Symbol Digits Modalities Test, and the Digits Backward Test.
- Several special codes were used in this dataset to indicate why tests (and test items) were not administered:
6 = Not administered because of physical impairment

- 7 = Not administered because of verbal refusal
- 8 = Not administered because of a behavioral reason
- 9 = Not administered for some other reason
- 10 = Administered but not according to protocol
- The flag FLGCOG10 is set for the 1 participant who completed the questionnaire after the 01/31/2008 cutoff.

Additional Measures

Several variables pertaining to the blood draw (serum hormone and cardiovascular measures) that were part of the follow-up interview were moved to a separate questionnaire. Those variables are now included in this part of the data dictionary.

Serum Hormone Measures

The Visit 10 hormone results are included. Of special note is that the estradiol assay was run in duplicate. The average (E2AVE10) is the within-person arithmetic average of the two assays. A flag indicates if the estradiol results differed by > 10 pg/mL where one or both results <= 20 pg/mL. Hormone results below the lower level of detection (LLD- see table in the Additional Measures section) were recoded to an .L value.

- Thyroid-stimulating hormone (TSH), which was last collected in Visit 4, is collected with visit 10.
- The flag FLGHRMV10 is set for the 2 participants who completed the questionnaire after the 01/31/2008 cutoff.

Bioimpedance Measures

Body composition was measured using bioimpedance equipment. Percent body fat (equation provided by Dr. MaryFran Sowers), skeletal muscle mass (Janssen, 2000), fat free mass, total body water, and percent body fat (all provided by RJL Systems and validated using NHANES III data (Chumlea, 2002)) are also provided. Variable MISSPHY10 flags where missing physical measures caused the created variables to be missing, and MISSCON10 flags where conductance was missing. A flag (FLAGSRP10) indicates where self-reported physical measures were used in calculations. A flag FLGBIOV10 indicates where one participant completed the bioimpedance measures after the Visit 10 cutoff (01/31/2008).

Additional variables

A variable describing the race/ethnicity of participants (RACE) and study site (SITE) were added from the Screener dataset. See the Additional Measures section at the end of the codebook for descriptions.

Date of completion variables (INTDAY10, SAADAY10, SABDAY10, PHYDAY10, HRMDAY10, COGDAY10, BIODAY10, CAMDAY10, and HYSTDAY10) are given in days from interview date at baseline. Note that for 5 participants, interview completion dates at baseline were not available and alternative dates were substituted either from the Self-Administered Questionnaire-A or Physical Measures completion dates at baseline.

Longitudinal Measures

Please note that additional study measures are provided in separate longitudinal datasets. These datasets include: Menopausal Status, Bone Mineral Density, Medication Drug Groups, and Vitamin D.

This questionnaire covers material that is sensitive and personal. For some women, sexual activity is an important part of their lives, but for others, it is not. Everyone has different ideas on this subject. To help us understand how these matters affect women's lives and health, we would like you to answer the following questions from your own personal viewpoint. There are no right or wrong answers. Remember, confidentiality is assured. While we hope you are willing to answer all of the questions, if there are questions you would prefer not to answer, you are free to skip them. Please find the most appropriate response to each question, and circle the number for the answer you choose.

B. EAST BOSTON MEMORY TEST I

I have some questions that involve remembering things and concentrating. Please try your best.

INTERVIEWER NOTE: RECORD ALL ANSWERS PROVIDED BY THE PARTICIPANT. ALL RESPONSES MUST BE GIVEN **WITHOUT** ANY AID TO MEMORY.

I. IMMEDIATE RECALL OF STORY

Now I would like to ask you to try to remember a short story.

First, I’m going to read you a short story and when I’m through, I’m going to wait a few seconds and then ask you to tell me as much as you can remember.

The story is:

Three children were alone at home and the house caught on fire. A brave fireman managed to climb in a back window and carry them to safety. Aside from minor cuts and bruises, all were well.

RECORD RESPONSE VERBATIM

SCORE EACH IDEA AS PRESENT OR ABSENT

<u>IMEDTHR10</u>	Idea	Present	Absent
_____	Three	1	0
<u>IMEDCH110</u>	Children	1	0

C. SYMBOL DIGIT MODALITIES TEST

Now, we are going to try something a little different.

PLACE THE LAMINATED TEST FORM IN FRONT OF RESPONDENT RESPONSES ON A BLANK SDMT FORM.

POINT TO KEY AT TOP OF PAGE AND SAY: Look at these boxes. Notice that each box has a little mark in the upper part and a number in the lower part. Each mark has its own number. Now look down here. [POINT]

Notice that the boxes on the top have marks, but the boxes on the bottom are empty. I want you to call out the number that goes with each mark. For example, look at the first mark and then look at the key. [POINT]

The number 1 goes with the first mark. So you call out the number 1 for the first box.

POINT OUT NEXT 2 ANSWERS: A 5 goes with this mark, and a 2 goes with this mark.

Now what number belongs in the next box?

POINT TO BOX IF NECESSARY. RECORD RESPONSE.

IF RESPONSE IS CORRECT, SAY: Good. You have the idea.

IF RESPONSE IS INCORRECT, SAY: No, that is a 1. AND POINT TO THE APPROPRIATE SYMBOL/ITEM PAIR IN KEY.

Now, for practice, tell me the numbers that belong in the rest of the boxes up to this line.

DRAW OVER THE DOUBLE LINE IN THE PRACTICE ROW.

Use your finger as you move along the row so you don't get lost.

RECORD RESPONSES TO REMAINING PRACTICE ITEMS (ANSWERS: 3 6 2 4 1 6). IMMEDIATELY CORRECT EACH ERROR AS ABOVE. RECORD "0" FOR NON-NUMERIC RESPONSES.

REINSTRUCT AND/OR ENCOURAGE GUESSING IF RESPONDENT IS CONFUSED ON THE PRACTICE ROW; E.G., If you don't know, guess a number from 1 to 9, and I'll tell you if you're right or wrong.

AFTER PRACTICE ROW IS COMPLETED, SAY:

Good, you know how to do them. I have some more of these I want you to do. When I tell you to begin start here [POINT TO THE FIRST SQUARE TO RIGHT OF DOUBLE LINE] and call out the numbers just like you have been doing until I say 'Stop.' If you make a mistake, tell me what you think the correct answer is. Do not skip any boxes and work as quickly as you can. Ready? Begin.

START TIMER AT "BEGIN," ALLOW 90 SECONDS, AND THEN SAY: Stop.

RECORD RESPONSES.

DO NOT REINSTRUCT FURTHER; IF PRESSED, SAY: Just do the best you can.

SYMBOL DIGIT MODALITIES TEST (CONTINUED) – SCORING:

D. DIGITS BACKWARD

ADMINISTRATION: MAKE SURE YOU HAVE RESPONDENT'S ATTENTION BEFORE PRESENTING EACH ITEM. READ DIGITS CLEARLY AT ONE-PER-SECOND RATE, LETTING VOICE PITCH DROP/RISE ON LAST DIGIT. PRESENT EACH ITEM ONLY ONCE. IF REPETITION IS REQUESTED, SAY: Just tell me what you can remember.

DISCONTINUE AFTER TWO CONSECUTIVE ERRORS AT A GIVEN ITEM LENGTH (e.g., IF BOTH 4a AND 4b ARE ERRORS). IF REQUESTED, REINSTRUCT: After I say the numbers, you are to say them backwards.

IF RESPONDENT REPEATS THE NUMBERS FORWARD, SCORE THE RESPONSE AS AN ERROR (0) AND REINSTRUCT AS ABOVE. ONLY ONE UNREQUESTED REINSTRUCTION IS PERMITTED.

SCORING: CLASSIFY EACH RESPONSE AS ERROR (0) OR CORRECT (1) AND ENTER THE SCORE IN THE SPACE PROVIDED. FOR ITEMS NOT ADMINISTERED DUE TO BRANCHING OR DISCONTINUATION RULE, PLACE AN "-1" IN THE SPACE PROVIDED; FOR ITEMS NOT ADMINISTERED FOR ANY OTHER REASON, ENTER THE APPROPRIATE CODE: 6 = PHYSICAL IMPAIRMENT; 7 = VERBAL REFUSAL; 8 = BEHAVIORAL REASON; 9 = OTHER REASON.

INSTRUCTION: Now, let's move on to another part. I am going to say some numbers. When I stop, I want you to say them backwards.

Now I would like to measure your body composition using this bioimpedance equipment. Body composition is the amount of body fluids, fat, and lean body mass, including your muscles and organs found in your body.

B1. Do you have an insulin pump, pacemaker or automatic implantable cardiac defibrillator (AICD)?

AICDPUM10

- NO.....1
- YES.....2 (END)
- DON'T KNOW..... -8 (END)

IF YES OR DON'T KNOW, **STOP**. SUBJECT INELIGIBLE FOR BIOIMPEDANCE

If you have not recently done so, I would like you to use the bathroom before we take this measurement. For this measurement, you will need to remove metal jewelry and your right sock and shoe. Two sticky pads called electrodes will be placed on your right hand at the wrist and knuckles and two more will be placed on your right foot at the toes and ankle. Once the electrodes are attached, it will take less than one minute for the equipment to measure your body composition.

Before we begin the bioimpedance measurement I need to ask you a few questions that will help us interpret the results.

B2. Have you exercised intensely for at least half an hour or taken a sauna within the last 12 hours? That is, since ___ : ___ a.m. / p.m.?

Please remove all metal jewelry. Although you won't feel anything, metal removal is encouraged for more accurate results. Now please remove your right shoe and sock before lying down on a table for the test.

REMOVE AND DISPOSE OF THE ELECTRODES, BE SURE NOT TO INJURE THE SUBJECT'S SKIN.
IF YOU HAVEN'T ALREADY DONE SO, COMPLETE QUESTION A10 = "YES (2)."

Thank you for your participation in this study.

IF AN **'OUT OF RANGE'** CONDUCTANCE OR REACTANCE IS DETECTED, IMMEDIATELY CHECK THE QUALITY OF THE ATTACHMENT OF THE ALLIGATOR CLAMPS AND THE SECURITY OF THE ELECTRODES TO THE SKIN. THEN, RE-DO THE PROCEDURE.

IF THE *SECOND* MEASUREMENT FALLS WITHIN THE VALID RANGE, IT SHOULD BE ENTERED INTO THE FIELD FOR Q.B8 OR Q.B9. THE *INITIAL* MEASUREMENT SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED "2=YES" RE-RUN.

IF THE SECOND ATTEMPT ALSO RESULTS IN AN INVALID RANGE, THEN VALIDATE WITH 500 OHM RESISTOR AND RE-RUN A THIRD ATTEMPT. IF THE *THIRD* MEASUREMENT FALLS WITHIN THE VALID RANGE, IT SHOULD BE ENTERED INTO THE FIELD FOR Q.B8 OR Q.B9. IF *THIRD* ATTEMPT VALUES ARE STILL INVALID, CODE "-2222" INSTEAD OF OUT OF RANGE VALUE. THE *INITIAL* AND *SECOND* MEASUREMENTS SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED "2=YES" RE-RUN.

THE ABOVE PROCEDURES SHOULD ALSO BE FOLLOWED IF A **VALID BUT NEGATIVE** VALUE (BETWEEN -1 AND -800) IS DETECTED FOR CONDUCTANCE (Q.B8). IF THE SECOND OR THIRD CONDUCTANCE MEASUREMENT RESULTS IN A POSITIVE VALUE, IT SHOULD BE ENTERED INTO Q.B8 AND THE INITIAL MEASUREMENT(S) SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED "2=YES" RE-RUN. IF ALL THREE MEASUREMENTS RESULT IN A NEGATIVE VALUE, THEN THE FINAL VALID MEASUREMENT (BETWEEN -1 AND -800) SHOULD BE ENTERED INTO Q.B8.

SERUM HORMONE MEASURES

1. Variables for assays

Variable	Assay	Units
DHAS10	Dehydroepiandrosterone sulfate	ug/dL
E2AVE10*	Estradiol (see important note below)	pg/mL
FSH10	Follicle-stimulating hormone	mIU/mL
SHBG10	Sex hormone-binding globulin	nM
T10	Testosterone	ng/dL
TSH10	Thyroid-stimulating hormone	uIU/mL

*** IMPORTANT NOTE:** There were originally two estradiol result variables because estradiol was run in duplicate. E2AVE2 is the within-person arithmetic average of the two estradiol variables.

2. Flags and other variables

Variable	Meaning	Codes
CYCDAY10	Day of cycle	n/a
FLGCV10	Both Estradiol results are > 20 pg/mL and the within-subject coefficient of variation (CV) is > 15%.	0=no, 1=yes
FLGDIF10	<p>One or both Estradiol results \leq 20 pg/mL and the difference between them is > 10 pg/mL.</p> <p>Note: Differences were found between some of the Estradiol duplicate measurements. The following guidelines were decided upon:</p> <ol style="list-style-type: none"> 1. If both E2 values > 20 pg/ml, CV must be \leq 15%. 2. If one or both E2 \leq 20 pg/ml, the two E2 results must agree within 10 pg/ml. <p>DATA WITH THESE FLAGS SHOULD BE OMITTED FROM DATA ANALYSES, OR USED WITH CAUTION IF INCLUDED IN ANALYSES.</p>	

*1=yes means flagged

3. *Changes to the data:*

- Lower limit of detection (LLD). Hormone results below the LLD were recoded to a value of '.L'.
- LLDs changed over time. The following LLDs were provided by the lab and apply to all samples through 2009:

Hormone	Time Window on hormone measurement corresponding to LLD	Lower Limit of Detection
DHEAS	~ Sep. 15, 1997	<1.52 ug/dL (Initial value)
	Sep. 16, 1997 ~ Jan. 14, 1999	<0.304 ug/dL

CARDIOVASCULAR MEASURES

1. *Variables for assays*

Variable	Assay	Units	Calibrated
CRPRESU10	C-reactive protein calibrated result	mg/l	Yes

2. *Flags and other variables*

Variable	Meaning	Codes
FLAGSER10	Flag to indicate that lipids were measured on serum rather than plasma because plasma was not available. Lipids for these subjects were <u>not</u> set to missing.	0=no, 1=yes

*1=yes means flagged

3. *Additional flag variables indicating "unusual" results data*

Flag variables have been created for each of the key primary CV results variables. These flag variables indicate 'unusual' or outlying values. They have been identified following examination of the 06 lab results, as well as longitudinal checks on absolute change, and percentage change, in values for a given participant between follow-ups 05 and 06.

The table below indicates the ranges that were used to identify 'unusual' values in the 06 dataset. Flags for all key variables were set to 1 for any result outside of these specified ranges. In the case of the longitudinal checks, we have identified unusual cases based on the distribution of the data. No flags were set to indicate the values identified by longitudinal checks, but outliers were identified, submitted to MRL for verification and were reported to be fine.
