TABLE OF CONTENTS

Documentation for the SWAN Visit 1 Dataset	4
Interview Questionnaire	7
Self-Administered Questionnaire Part A	32
Self-Administered Questionnaire Part B	55
Physical Measures	60
Additional Measures	62

1. Who is included in the public use dataset:

The dataset contains the first follow-up visit information for the subset of the original cohort still participating in the SWAN longitudinal study from the seven clinical sites. The sites include Boston, MA, Pittsburgh, PA, Oakland and Los Angeles, CA, Detroit, MI, Newark, NJ, and Chicago, IL.

Differences from the prior release of the Visit 01 archive dataset (nia12018): Cardiovascular measures (assay and flag variables) were updated as follows:

- Insulin assays in visits 00-07 were run at Medical Research Laboratories (MRL) in Highland Heights, KY, while insulin at visits 09-15 was done at the Central Ligand Assay Satellite Services (CLASS) Laboratory at the University of Michigan, Ann Arbor MI. To calibrate insulin to a single lab for use in future longitudinal analyses, 400 samples drawn from visits 00-15 were run at an independent laboratory using the same method as the CLASS lab but a different machine. The results from the independent lab were used to calibrate CLASS to MRL at visits 09-15, the insulin values at visits 00- 07 are left as originally provided from MRL.
- Glucose was calibrated so that the MRL lab measurements from Visits 00-07 could be compared with University of Michigan Pathology lab measurements done for Visits 09-15. NOTE: the calibration study indicated that calibration equations be developed and applied by visit. Thus, the calibration provided is unique to Visit 01. In addition, the flags for calibrated results were changed to the range of the lab results to which they were being calibrated.
- C-Reactive Protein (CRP) was calibrated via a log transformed value of the original MRL CRP value, and back transformed after calibration. NOTE: Given there may be differences in results depending on the sample media used, the calibration equations were developed using only plasma samples.
- Fibrinogen was calibrated after a subset of the assays from V00-V07 was measured via the CLASS method and the results compared to the original MRL Fibrinogen values. The calibration allows comparison between the old MRL assays and the new CLASS assays and takes into account age.
- Factor VIIc was calibrated via a log transformed value of the original MRL Factor VIIc value, and back transformed after calibration.
- FLAGSER1 was inconsistently applied over visits, and did not capture whether the analyte was measured on serum rather than plasma. This flag now indicates that the plasma draw was not obtained, and serum from another draw was sent to the lab.
- FLAGFAS1 a flag that indicates if the blood sample was fasting was added.
- Flags to indicate out of range values for results were added. In addition, the flags for calibrated results were changed to the range of the lab results to which they were being calibrated

NOTE: A detailed description of cardiovascular lab methods and calibrations by visit can be found in the document entitled *SWAN Cardiovascular Laboratories and Methods*.

2. How this codebook is constructed:

Following this documentation section are copies of each of the questionnaires that were used at the first follow-up visit. A list of additional variables is also provided. The questionnaires include the variables available for public use next to the question in bold red uppercase underlined letters. Those variables not available for public use have a # before the variable and are in blue. Any special notes are indicated with footnotes at the bottom of the page.

The assigned participant ID has been replaced with a randomly generated ARCHID in order to protect participant privacy. The *baseline* interview date is denoted as day 0 and is used as the basis for all other dates. All other questionnaires or data collected that have a date attached have been converted to the number of days from the baseline interview. For example, if the Visit 1 Self-Administered Questionnaire Part A was collected a year after the baseline interview, the day for the Self-Administered Part A would be day 365 and the Interview would be day 0.

All variables for visit 1 have a 1 at the end of the variable name.

3. Missing data coding:

Original missing codes (-1: not applicable, -7: refused, -8: don't know, -9: missing) have been recoded to SAS missing codes (.B: not applicable, .D: refused, .C: don't know, and .A: missing).

4. Ways this data can be used and additional notes

Interview Questionnaire

The date of the specimen mentioned in A.15 is in the variable SPEDAY1. Several questions were added or changed with the 9/15/1997 version of the interview form, and these are detailed on the last page of the interview form in the codebook. Question C4 was asked as one question with six responses in the 9/15/1997 version, rather than six separate questions with a Yes/No answer in the original version. Question C10 was added, and contained the variables used to create the perceived stress variable. Question E5 had an additional response (response 8) added for the 9/15/1997 version of the form. An osteoporosis variable was created based on text fields in the other prescription medication questions.

- A social support score can be calculated from the questions in C.9.a-d after recoding them from a 1-5 range to a 0-4 range.
- o CES-D scores can be created from the questions in C.10 (C.11 in the 9/15/1997 version of the form).
- o A perceived stress score can be created from questions in C.10 in the 9/15/1997 version of the form.

Self-Administered Questionnaire Part A

- o In general, any 'Other, specify' text field is not included in the dataset
- The income question I.1 was condensed into a dichotomous variable (THPPOV1) representing above/below the 200% poverty threshold. Poverty was defined using the US Census Bureau's "Poverty thresholds by Size of Family and Number of Children: 1995" and incorporates family size. To stay consistent with previous SWAN papers using income data, the lower level of each income category reported in the original income question was used as threshold.
- The health services needed specify text fields under section B.7a (HLTHSV11, HLTHSV21, HLTHSV31) were categorized by type of service and included as HLSCAT11, HLSCAT21, and HLSCAT31.
- o Current smoking is defined as anyone who answered 'yes' to question B.8 (SMOKERE1) and an answer greater than 0 for B.8.a (AVGCIGDA1). The created variable SMOKER1 is 'yes' for current smokers.
- SF-36 scores can be derived based on questions B.14-20 according to the SF-36 User's Manual. Responses may need to be reversed where necessary so that all items are positively scored, so that a higher value indicates better functioning. The Role-Physical scale uses the variables from question B.14a-d. The Bodily Pain Score is calculated from questions B.17 and B.18. Item recoding depends on whether both questions were answered or one of the items has missing data. After recoding, all the items are positively scored so that a higher score indicates less pain. The SF-36 Vitality Score is calculated from questions B.19a-d. Questions B.19.a and B.19.b should be reversed so that all items are positively scored; for the resulting index a higher score indicates greater energy (and less fatigue). The Social Functioning Score is calculated using questions B.16 and B.20. Question B.16 is reversed so that all items are positively scored; for the resulting index a higher score indicates better social functioning. The Role-Emotional Score is calculated using questions B.15a-c. All items are positively scored, so a higher score indicates better role-emotional functioning.

Self-Administered Questionnaire Part B

One participant completed the questionnaire after the Visit 1 cut-off date of January 31, 1999, and the variable FLGSABV1 indicates this.

Physical Measures

In addition to the variables on the form, BMI1 was also calculated as weight in kilograms divided by the square of height in meters.

Additional Measures

Additional variables

A variable describing the race/ethnicity of participants (RACE) and study site (SITE) were added from the Screener dataset. See the Additional Measures section at the end of the codebook for descriptions.

Date of completion and other date variables (INTDAY1, SAADAY1, SABDAY1, PHYDAY1, HRMDAY1, CVRDAY1, PROTDAY1, SPEDAY1, and HYSTDAY1) are given in days from interview date at baseline. Note that for 5 participants,

interview completion dates at baseline were not available and alternative dates were substituted either from the Self-Administered Questionnaire-A or Physical Measures completion dates at baseline.

Serum Hormone Measures

The visit 1 hormone results are included. Of special note is that the estradiol assay was run in duplicate. The average (E2AVE1) is the within-person arithmetic average of the two assays. A flag indicates if the estradiol results differed by > 10 pg/mL where one or both results <= 20 pg/mL. Hormone results below the lower level of detection (LLD- see table in the Additional Measures section) were recoded to an .L value.

Cardiovascular Measures

A flag (FLAGSER1) indicates that the lipids were measured on serum rather than plasma because plasma was not available. One participant had samples collected after the Visit 1 cut-off date of January 31, 1999, and the flag FLGCVRV1 indicates this.

Longitudinal Measures

Please note that additional study measures are provided in separate longitudinal datasets. These datasets include: Menopausal Status, Bone Mineral Density, Medication Drug Groups, and Vitamin D.

Study of Women's Health Across the Nation

ANNUAL FOLLOW-UP INTERVIEW

SECTION A. GENERAL INFORMATION

ASK RESPONDENT TO GATHER PRESCRIPTION MEDICATIONS SO THEY ARE WITHIN REACH. REMEMBER, DO NOT READ OUT LOUD ANY SCRIPT IN CAPITAL LETTERS.

I would like to begin the interview by asking you some questions about medications.

The medications you take, both those prescribed <u>and</u> from over-the-counter (OTC), can have a major influence on how well you feel, how you respond to events in your life, and the continued maintenance of your health. We want to know about any medications you have taken <u>since your last study visit.</u>

I will start by asking about any pills or medicines, including patches, suppositories, injections, creams and ointments which are <u>prescribed</u> by your doctor or other health care provider, that you have taken <u>since your last study visit</u>.

IF YES TO ANY, RECORD MEDICATION NAME IN THE SPACES PROVIDED	<u>PRESCRIPTION DRUGS</u> IF YES:

We would like to ask you for some important information that will help us to understand your answers better. Please remember that all of your answers will of course remain confidential.

I1. What is your total family income (before taxes) from all sources within your household in the last year? (Circle the answer that is your <u>best guess.)</u>

	#INCOMET THPPOVIS
LESS THAN \$19,999	
\$20,000 TO \$49,999	2
\$50,000 TO \$99,999	
\$100,000 OR MORE	
REFUSED	7
DON'T KNOW	8

The next question deals with how you respond to your physical senses. For each item, please indicate the degree to which each statement is TRUE OF YOU in general.

J1. Please circle the number that corresponds to your answer for each statement below:

(CIRCLE ONLY ONE ANSWER FOR EACH QUESTION)

	Not at all True	A little bit true	Moderately true	Quite a bit true	Extremely true
a. I am often aware of various things happening within my body.	1	2	3	4	5
<u>AWAREBO1</u>					
b. Sudden loud noises really bother me. NOISES1	1	2	3	4	5
c. I hate to be too hot or too cold. HOTCOLD1	1	2	3	4	5
d. I am quick to sense the hunger contractions in my stomach. HUNGER1	1	2	3	4	5
e. I can't stand pain. STNDPAI1	1	2	3	4	5

[§] I.1 Income categories have been condensed to THPPOV1 "Under 200 percent poverty" (Yes/No)

K1. Please read the following statements about yourself and indicate how much the statement describes the way you usually are. (CIRCLE ONE NUMBER ON EACH LINE)

	A lot like me	Somewhat like me	A little like me	Not at all like me
a. In uncertain times, I usually expect the best. EXPBEST1	3	2	1	0
b. If something can go wrong for me, it will. GOWRONG1	3	2	1	0
c. I'm always optimistic about my future.	3	2	1	0
d. I hardly ever expect things to go my way.				

The following section will ask you about personal feelings. These questions are important, as our feelings may directly affect our health or influence how we respond to health issues.

L1. In your day-to-day life have you had the following experiences: (CIRCLE ONE ANSWER FOR EACH)

		Often	Sometimes	Rarely	Never
a.	You are treated with less courtesy than other people. COURTES1	1	2	3	4
b.	You are treated with less respect than other people. RESPECT1	1	2	3	4
c.	You receive poorer service than other people at restaurants or stores.	1	2	3	4
d.	People act as if they think you are not smart.	1	2	3	4
e.	People act as if they are afraid of you. AFRAIDO1	1	2	3	4
f.	People act as if they think you are dishonest. DISHONS1	1	2	3	4
g.	D 1 (C) 1 1 1 (C)	1	2	3	4
h.	You or your family members are called names or insulted. INSULTE1	1	2	3	4
i.	You are threatened or harassed. HARASSE1	1	2	3	4
j.	People ignore you or act as if you are not there.	1	2	3	4

IGNORED1

IF YOU ANSWERED "OFTEN" OR "SOMETIMES", TO ONE OR MORE STATEMENTS IN L1, PLEASE ANSWER QUESTION L2.

L2. Were any of the following reasons why you "sometimes" or "often" had these experiences? (CIRCLE ONE ANSWER FOR EACH.)

a. Race	BCRACE1	NO 1	YES 2
b. Ethnicity	BCETHN1	1	2
c. Gender	BCGENDR1	1	2
d. Age	BCAGE1	1	2
e. Income Level	BCINCML1	1	2
f. Language	BCLANG1	1	2
g. Body Weight	BCWGHT1	1	2
h. Physical Appearance (other than body	weight) <u>BCPHAPP1</u>	1	2
i. Sexual Orientation	BCORIEN1	1	2
j. Other Specify:	OTHEREX1 #OTHRSPE1	1	2

Thank you for your time. This ends this questionnaire.

Please give it to the study personnel.

This questionnaire covers material that is sensitive and personal. For some women, sexual activity is an important part of their lives, but for others, it is not. Everyone has different ideas on this subject. To help us understand how these matters affect women's lives and health, we would like you to answer the following questions from your own personal viewpoint. There are no right or wrong answers. Remember, confidentiality is assured. While we hope you are willing to answer all of the questions, if there are questions you would prefer not to answer, you are free to skip them. Please find the most appropriate response to each question, and circle the number for the answer you choose.

ADDITIONAL MEASURES COLLECTED

The following measures that were collected at Visit 01 have been included in the codebook:

SERUM HORMONE MEASURES

1. Variables for assays

Variable	Assay	Units
DHAS1	Dehydroepiandrosterone sulfate	ug/dL
E2AVE1*	Estradiol (see important note below)	pg/mL
FSH1	Follicle-stimulating hormone	
SHBG1	Sex hormone-binding globulin	
<u>T1</u>	Testosterone	ng/dL

^{*} IMPORTANT NOTE: There were originally two estradiol result variables because estradiol was run in duplicate. E2AVE1 is the within-person arithmetic average of the two estradiol variables.

2. Flags and other variables

Variable	Meaning	Codes
CYCDAY1	Day of cycle	n/a
FLGCV1	Both Estradiol results are > 20 pg/mL and the within- subject coefficient of variation (CV) is > 15%.	0=no, 1=yes(flagged)
FLGDIF1	One or both Estradiol results ≤ 20 pg/mL and the difference between them is > 10 pg/mL.	
	Note: Differences were found between some of the Estradiol duplicate measurements. The following guidelines were decided upon: 1. If both E2 values>20 pg/ml, CV must be ≤15%. 2. If one or both E2≤20 pg/ml, the two E2 results must agree within 10 pg/ml.	
	DATA WITH THESE FLAGS SHOULD BE OMITTED FROM DATA ANALYSES, OR USED WITH CAUTION IF INCLUDED IN ANALYSES.	

3. Changes to the data:

• Lower limit of detection (LLD). Hormone results below the LLD were recoded to a value of '.L'.

LLDs changed over time. The following LLDs were provided by the lab and applied to all samples:

Hormone	Time Window on hormone measurement corresponding to LLD	Lower Limit of Detection
DHEAS	~ Sep. 15, 1997	<1.52 ug/dL (Initial value)
	Sep. 16, 1997 ~ Jan. 14, 1999	<0.304 ug/dL
	Jan. 15, 1999 ~	<1.5 ug/dL
E2	~ Feb. 20, 2000	<1.0 pg/mL (Initial value)
	Feb. 21, 2000 ~ Aug. 27, 2001	<2.0 pg/mL
	Aug. 28, 2001 ~ May 03, 2009	<4.0 pg/mL
	May 04, 2009 ~	<7.0 pg/mL
FSH	~ Aug. 05, 1999	<1.05 mIU/mL (Initial value)
	Aug. 06, 1999 ~ Nov. 10, 1999	<1.0 mIU/mL
	Nov. 11, 1999 ~ Jul. 19, 2000	<0.7 mIU/mL
	Jul. 20, 2000 ~ Oct. 29, 2002	<0.6 mIU/mL
	Oct. 30, 2002 ~ Sep. 28, 2003	<0.5 mIU/mL
	Sep. 29, 2003 ~ Feb 20, 2006	<0.4 mIU/mL
	Feb 21, 2006 ~	<0.8 mIU/mL
SHBG	~ Aug. 05, 1999	<1.95 nM (Initial value)
	Aug. 06, 1999 ~ Oct. 31, 1999	<1.9 nM
	Nov. 01, 1999 ~ Mar. 22, 2006	<2.0 nM
	Mar. 23, 2006 ~	<3.2 nM
Т	~ Jun. 04, 1998	<2.19 ng/dL (Initial value)
	Jun. 05, 1998 ~ Jun. 17, 1999	<2.2 ng/dL
	Jun. 18, 1999 ~	<2.0 ng/dL

CARDIOVASCULAR MEASURES

1. Variables for assays

Variable	Assay	Units	Calibrated
CHOLRES1	Total cholesterol result	mg/dl	N/A
TRIGRES1	Triglycerides result	mg/dl	N/A
LDLRESU1	Low-density lipoprotein cholesterol (estimated) result	mg/dl	N/A
HDLRESU1	High density lipoprotein cholesterol result	mg/dl	N/A

INSURES1	Insulin result	uIU/ml	N/A
FACRESU1	Factor VII calibrated result	%	Yes
FIBRESU1	Fibrinogen calibrated result	mg/dl	Yes
PAIRESU1	PAI-1 result	ng/ml	N/A
TPARESU1	tPA result	ng/ml	N/A
LPARESU1	Lipoprotein Lp(a) result	mg/dl	N/A
LPA1RES1	Lipoprotein A-1 result	mg/dl	N/A
APOARES1	Apolipoprotein A-1 result	mg/dl	N/A
APOBRES1	Apolipoprotein B result	mg/dl	N/A
CRPRESU1	C-reactive protein calibrated result	mg/l	Yes

2. Flags and other variables

Variable	Meaning	Codes
FLAGSER1	Flag to indicate that lipids were measured on serum rather than plasma because plasma was not available. Lipids for these subjects were <u>not</u> set to missing.	0=no, 1=yes
FLGCVRV1	Flag to indicate the sample was collected after the cut-off date for Visit 1 (01/31/1999)	0=no, 1=yes
FLAGFAS1	Flag to indicate that the sample was non-fasting or that fasting information was missing or unreliable. Since triglycerides, insulin, and glucose must be measured on fasting samples, these 3 analytes were set to missing when FLAGFAS1=1.	0=No 1=Yes

^{*1=}yes means flagged

3. Additional flag variables indicating "unusual" results data:

Flag variables have been created for each of the key primary CV results variables. The table below indicates the ranges that were used to identify these" unusual" values. Flags for all key variables were set to 1 for any result outside of these specified ranges. According to the lab "Most of the other analytes listed below are automatically rechecked when the result falls outside of the reference range."

Lab result	Flag Name	Flag Range	Units
Total Cholesterol	CHOLFLG1	(100, 500)	mg/dl
Triglycerides	TRIGFLG1	(20, 2000)	mg/dl
Total HDL	HDLFLG1	(20, 150)	mg/dl
LDL	LDLFLG1	(25, 400)	mg/dl
Lipoprotein Lp(a)	LPAFLG1	(0, 150)	mg/dl
Fibrinogen	FIBFLG1	(128, 1020)	mg/dl
Factor VIIc	FACFLG1	(12.5, 200)	%
Plasminogen activator inhibitor-1 (PAI-1)	PAIFLG1	(0, 150)	ng/ml
Tissue plasminogen activator Antigen (TPA Antigen)	TPAFLG1	(1, 30)	ng/ml
Glucose	GLUCFLG1	(40, 400)	mg/dl
Insulin	INSUFLG1	(1, 60)	uIU/ml
Lipoprotein A-1 (Lp(a)1)	LPA1FLG1	(30, 80)	mg/dl
Apolipoprotein A-1	APOAFLG1	(80, 240)	mg/dl
Apolipoprotein B	APOBFLG1	(60, 200)	mg/dl
C-reactive protein	CRPFLG1	(0.00001, 100)	mg/l

4. Changes to the data:

- <u>Non-fasting Triglycerides, Insulin, & Glucose -</u> If women were not fasting, triglycerides, insulin and glucose were set to missing in the frozen data set because these assays are not valid for non-fasting samples.
- <u>Estimated vs. Direct LDL</u>. LDL is estimated using the Friedewald equation for all women with triglycerides below 400 mg/dl. If triglycerides exceed 400 mg/dl, LDL is set to missing.
- <u>Serum lipids</u>. A few subjects had their lipids measured from serum rather than plasma. The results were left as is but subjects were flagged (FLAGSER1=1).

RACE/ETHNICITY

RACE: Participant race/ethnicity is provided from the Screener dataset, coded as:

- 1= Black
- 2= Chinese/Chinese American
- 3= Japanese/Japanese American
- 4= White Non-Hispanic
- 5= Hispanic

SITE

SITE: Participant study site is provided from the Screener dataset, coded as:

- 11= Detroit, MI
- 12= Boston, MA
- 13= Chicago, IL
- 14= Oakland, CA
- 15= Los Angeles, CA
- 16= Newark, NJ
- 17= Pittsburgh, PA
