DOCUMENTATION FOR THE PUBLIC-USE SWAN VISIT 07 DATASET

1. Who is included in the public use dataset:

The dataset contains follow-up visit 7 information for the 3,302 women from the 7 clinical sites participating in the SWAN longitudinal study. The sites include Boston, MA, Pittsburgh, PA, Oakland and Los Angeles, CA, Detroit, MI, and Chicago, IL. Data was not collected from New Jersey for this visit.

2. How this codebook is constructed:

Following this documentation section are copies of each of the questionnaires that were used at visit 7. A list of additional variables is also provided. The questionnaires include the variables available for public use next to the question in bold red uppercase underlined letters. Those variables not available for public use have a # before the variable and are in blue. Any special notes are indicated with footnotes at the bottom of the page.

The assigned participant ID has been replaced with a randomly generated ARCHID in order to protect participant privacy. The *baseline* interview date is denoted as day 0 and is used as the basis for all other dates. All other questionnaires or data collected that have a date attached have been converted to the number of days from the baseline interview. For example, if the Visit 7 Self-Administered Questionnaire Part A was collected 7 years after the baseline interview, the day for the Self-Administered Part A would be day 2555 and the Baseline Interview would be day 0.

All variables for visit 7 have a 7 at the end of the variable name.

3. Missing data coding:

Original missing codes (-1: not applicable, -7: refused, -8: don't know, -9: missing) have been recoded to SAS missing codes (.B: not applicable, .D: refused, .C: don't know, and .A: missing).

4. Ways this data can be used and additional notes

Interview Questionnaire

- In general, any 'Other, specify' text field is not included in the dataset.
- CES-D scores can be created from the questions in F.3.
- A perceived stress score can be created from questions in F.2.
- In depth complementary and alternative medicine questions are asked in questions C.1 through C.21. Whereas visit 6 had the questions as part of the self-administered questionnaire, this visit included the questions in the interview portion of the visit.
- The flag FLGINTV7 is set for the 3 participants who completed the questionnaire before visit 7 began (5/15/2003).
- Several form versions of the interview could be administered, depending on the amount of time available or the location of the visit. The flag FORMINT7 was set to indicate which version of the interview was administered:
 - a) FUI indicates participants that completed the full interview.
 - b) AINT (Abbreviated FU interview) (94 participants) completed an abbreviated interview in combination with either an abbreviated or full Self-Administered Part A form.
 - c) AFUI (Abbreviated Plus FU Interview) (21 participants) completed a new abbreviated form of the interview made available with visit 7 that comprised key questions from the interview and Self-Administered Questionnaire – Part A.
 - d) OFUI (One Hour Abbreviated Follow-up Interview) (24 participants) completed another new abbreviated form of the interview made available with visit 7 that comprised key questions from the interview and Self-Administered Questionnaire – Part A where the participant said they had one hour available.

Self-Administered Questionnaire Part A

A Self-A Amended Telephone Interview (PATI), comprised of key questions from the core Follow-up Self-Administered Questionnaire Part A, was administered at study visits in cases where the Self-Administered Questionnaire was not completed. Similarly, an Abbreviated Follow-up Interview (AINT), comprised of key questions from the core Annual Follow-up Interview and Self-Administered Questionnaire Part A, was administered for participants who are not willing to come in for a core study visit, but who were willing to give 10 or 15 minutes of their time to answer questions over the telephone. Two new abbreviated versions of the Self-A (AFUI and OFUI) are described above. The flag FORMSAA7 delineates those who did the full questionnaire (SAA) from the 80 participants who did the abbreviated questionnaire (AIN), the 20 that did the phone interview (PAT), the 21 that did the abbreviated plus follow-up interview (AFU) and the 16 that did the one hour abbreviated follow-up (OFU).

- In general, any 'Other, specify' text field is not included in the dataset.
- The income question E.1 was condensed into a dichotomous variable THPPOV7 representing above/below the 200% poverty threshold. Poverty was defined using the US Census Bureau's "Poverty thresholds by Size of Family and Number of Children: 1995" and incorporates family size. To stay consistent with previous SWAN papers using income data, the lower level of each income category reported in the original income question was used as threshold.
- Current smoking is defined as anyone who answered 'yes' to question B.9 (SMOKERE7) and an answer greater than 0 for B.9a (AVGCIGDA7).
- Positive and Negative Affect Schedule (PANAS) Scores can be derived from questions F.1.a through F.1.t. A subset of the participants answered the Japanese version, which has 22 culturally appropriate items rather than the 20 items asked on the English version. There is no direct correlation between the two versions, so all Japanese items have been set to missing. In addition, question F.1.b has been set to missing because 'disinterested' was on the form, but the correct PANAS term is 'distressed.' It is suggested that the raw 9 item negative affect score, when multiplied by 1.112, can be made comparable to the positive affect score and the outcomes found in the literature.
- Spielberger Trait Anxiety Inventory can be calculated from questions G.1.a-j. This is normally a 20-item scale, but SWAN uses only 10 items. A score can be derived by reversing applicable questions so that all items are positively scored, and then summing the items. A higher total value indicates high trait anxiety.
- Interpersonal Mistreatment and Discrimination Scale Factors can be calculated from the items in H.1.a-j.
- The Hopelessness Scale from the Kuopio Ischemic Heart Disease Study can be calculated from questions J.1.a and J.1.b. These items are reverse-coded and summed to create a hopelessness score.
- The flag FLGSAAV7 is set for the 2 participants who completed the questionnaire after the 03/21/2005 cutoff, and also for the seven participants that completed the questionnaire before Visit 7 began (5/13/2003).

Physical Measures

- In addition to the variables on the form, BMI7 was also calculated as weight in kilograms divided by the square of height in meters.
- The flag FORMPHY7 is set for the participants who completed either the full physical (PHY), abbreviated interview (AIN), or the phone interview (PAT). No physical measures were performed for the abbreviated or phone interview (AIN and PAT); however, self-reported weight was collected on the abbreviated interview.

Cognitive Function Form

- Individual and summary scores are available for the following tests: East Boston Memory Test (both the immediate and delayed recall of a story), Symbol Digits Modalities Test, Faces (both immediate and delayed recall) and the Digits Backward Test.
- The flag FLGCOGV7 is set for the three participants who completed the questionnaire before Visit 7 began (5/15/2003).
- Several special codes were used in this dataset to indicate why tests (and test items) were not administered:
 - 6 = Not administered because of physical impairment
 - 7 = Not administered because of verbal refusal
 - 8 = Not administered because of a behavioral reason
 - 9 = Not administered for some other reason
 - 10 = Administered but not according to protocol

Additional Measures

Several variables pertaining to the blood draw (serum hormone and cardiovascular measures) that were part of the follow-up interview were moved to a separate questionnaire. Those variables are now included in this part of the data dictionary.

Serum Hormone Measures

The Visit 7 hormone results are included. Of special note is that the estradiol assay was run in duplicate. The average (E2AVE7) is the within-person arithmetic average of the two assays. A flag indicates if the estradiol results differed by > 10 pg/mL where one or both results <= 20 pg/mL. Hormone results below the lower level of detection (LLD- see table in the Additional Measures section) were recoded to an .L value.

Cardiovascular Measures

The Visit 7 cardiovascular results are included. A flag (FLAGSER7) indicates that the lipids were measured on serum rather than plasma because plasma was not available. Fibrinogen, Factor VII, and Lipoprotein A-1 were only run on half the participants.

Bioimpedance Measures

Body composition was measured using bioimpedance equipment. Percent body fat (equation provided by Dr. MaryFran Sowers), skeletal muscle mass (Janssen, 2000), fat free mass, total body water, and percent body fat (all provided by RJL Systems and validated using NHANES III data (Chumlea, 2002)) are also provided. MISSPHY7 flags where missing physical measures caused the created variables to be missing, and MISSCON7 flags where conductance was missing. A flag (FLAGSRP7) indicates where self-reported physical measures were used in calculations.

Additional variables

A variable describing the race/ethnicity of participants (RACE) and study site (SITE) were added from the Screener dataset. See the Additional Measures section at the end of the codebook for descriptions.

Date of completion variables (INTDAY7, SAADAY7, PHYDAY7, HRMDAY7, CVRDAY7, SPEDAY7, COGDAY7, BIODAY7, CAMDAY7, HYSTDAY7, LMPDAY7, HORMDAY7) are given in days from interview date at baseline. Note that for 5 participants, interview completion dates at baseline were not available and alternative dates were substituted either from the Self-Administered Questionnaire-A or Physical Measures completion dates at baseline.

Longitudinal Measures

Please note that additional study measures are provided in separate longitudinal datasets. These datasets include: Menopausal Status, Bone Mineral Density, Medication Drug Groups, and Vitamin D.

B. EAST BOSTON MEMORY TEST I

I have some questions that involve remembering things and concentrating. Please try your best.

INTERVIEWER NOTE: RECORD ALL ANSWERS PROVIDED BY THE PARTICIPANT. ALL RESPONSES MUST BE GIVEN **WITHOUT** ANY AID TO MEMORY.

I. IMMEDIATE RECALL OF STORY

Now I would like to ask you to try to remember a short story.

First, I’m going to read you a short story and when I’m through, I’m going to wait a few seconds and then ask you to tell me as much as you can remember.

The story is:

Three children were alone at home and the house caught on fire. A brave fireman managed to climb in a back window and carry them to safety. Aside from minor cuts and bruises, all were well.

WAIT FIVE SECONDS, THEN SAY: Please tell me the story.

C. FACES I

Now we will move to another exercise.

HAVE **STIMULUS BOOKLET I** READY. RECORDING OF THE PARTICIPANT'S RESPONSES AND SCORING FOR FACES I ARE DONE ON THE FOLLOWING PAGE. THERE IS NOTHING TO WRITE DOWN WHILE PRESENTING THE INITIAL SET OF FACES (1-24). THE PRIMARY MEASURE OF PERFORMANCE IS THE NUMBER OF FACES CORRECTLY IDENTIFIED.

READ THE INITIAL INSTRUCTION: "I am going to show you some pictures of faces, one at a time. Look at each face carefully and remember what it looks like. Remember each one."

EXPOSE EACH PHOTOGRAPH (1-24) FOR 2 SECONDS AND SAY, "Remember this one."

WHEN ALL HAVE BEEN PRESENTED READ THE NEXT INSTRUCTION. "Now I am going to show you some more pictures of faces, one at a time. I want you to look at the face on each page carefully. Say "Yes" if the face is one that I asked you to remember or "No" if it is not."

IF THE RESPONDENT DOES NOT UNDERSTAND THE DIRECTIONS, YOU MAY REPEAT THEM, PARAPHRASING WHERE NECESSARY.

TURN THE PAGE TO EXPOSE ITEM 1. EXPOSE EACH PHOTOGRAPH (1-48). RECORD THE PARTICIPANT'S RESPONSES ON PAGE 4 OF THIS FORM. CIRCLE WHETHER THE RESPONDENT SAYS "YES" OR "NO" TO EACH OF THE 48 FACES THAT ARE PRESENTED (i.e. CIRCLE "Y / YES" OR "N / NO"). LATER, THE RESPONSES ARE SCORED AS CORRECT OR NOT (i.e. BOLDFACE TYPE YES/NO=1, AND Y/N=0).

AFTER YOU HAVE SHOWN THE LAST RECOGNITION FACE FOR FACES I AND RECORDED THE RESPONSE, GIVE THE FINAL INSTRUCTION. I want you to remember the first group of faces I asked you to remember because later on I'm going to ask you to pick them out of another group of faces.

D. SYMBOL DIGIT MODALITIES TEST

Now, we are going to try something a little different.

PLACE THE LAMINATED TEST FORM IN FRONT OF RESPONDENT RESPONSES ON A BLANK SDMT FORM.

POINT TO KEY AT TOP OF PAGE AND SAY: Look at these boxes. Notice that each box has a little mark in the upper part and a number in the lower part. Each mark has its own number. Now look down here. [POINT]

Notice that the boxes on the top have marks, but the boxes on the bottom are empty. I want you to call out the number that goes with each mark. For example, look at the first mark and then look at the key. [POINT]

The number 1 goes with the first mark. So you call out the number 1 for the first box.

POINT OUT NEXT 2 ANSWERS: A 5 goes with this mark, and a 2 goes with this mark.

Now what number belongs in the next box?

POINT TO BOX IF NECESSARY. RECORD RESPONSE.

IF RESPONSE IS CORRECT, SAY: Good. You have the idea.

IF RESPONSE IS INCORRECT, SAY: No, that is a 1. AND POINT TO THE APPROPRIATE SYMBOL/ITEM PAIR IN KEY.

Now, for practice, tell me the numbers that belong in the rest of the boxes up to this line.

DRAW OVER THE DOUBLE LINE IN THE PRACTICE ROW.

Use your finger as you move along the row so you don't get lost.

RECORD RESPONSES TO REMAINING PRACTICE ITEMS (ANSWERS: 3 6 2 4 1 6). IMMEDIATELY CORRECT EACH ERROR AS ABOVE. RECORD "0" FOR NON-NUMERIC RESPONSES.

REINSTRUCT AND/OR ENCOURAGE GUESSING IF RESPONDENT IS CONFUSED ON THE PRACTICE ROW; E.G., If you don't know, guess a number from 1 to 9, and I'll tell you if you're right or wrong.

AFTER PRACTICE ROW IS COMPLETED, SAY:

Good, you know how to do them. I have some more of these I want you to do. When I tell you to begin start here [POINT TO THE FIRST SQUARE TO RIGHT OF DOUBLE LINE] and call out the numbers just like you have been doing until I say 'Stop.' If you make a mistake, tell me what you think the correct answer is. Do not skip any boxes and work as quickly as you can. Ready? Begin.

START TIMER AT "BEGIN," ALLOW 90 SECONDS, AND THEN SAY: Stop.

RECORD RESPONSES.

DO NOT REINSTRUCT FURTHER; IF PRESSED, SAY: Just do the best you can.

ADMINISTRATION: MAKE SURE YOU HAVE RESPONDENT'S ATTENTION BEFORE PRESENTING EACH ITEM. READ DIGITS CLEARLY AT ONE-PER-SECOND RATE, LETTING VOICE PITCH DROP/RISE ON LAST DIGIT. PRESENT EACH ITEM ONLY ONCE. IF REPETITION IS REQUESTED, SAY: Just tell me what you can remember.

IF RESPONDENT REPEATS THE NUMBERS FORWARD, SCORE THE RESPONSE AS AN ERROR (0) AND REINSTRUCT AS ABOVE. ONLY ONE UNREQUESTED REINSTRUCTION IS PERMITTED.

SCORING: CLASSIFY EACH RESPONSE AS ERROR (0) OR CORRECT (1) AND ENTER THE SCORE IN THE SPACE PROVIDED. CIRCLE WHETHER THE RESPONDENT SAYS "YES" OR "NO" TO EACH OF THE 48 FACES THAT ARE PRESENTED (i.e. CIRCLE "Y / YES" OR "N / NO"). LATER, THE RESPONSES ARE SCORED AS CORRECT OR NOT (i.e. BOLDFACE TYPE YES/NO=1, AND Y/N=0).

Now I would like to measure your body composition using this bioimpedance equipment. Body composition is the amount of body fluids, fat, and lean body mass, including your muscles and organs found in your body.

B1. Do you have an insulin pump, pacemaker or automatic implantable cardiac defibrillator (AICD)?

AICDPUM7

- NO.....1
- YES.....2 (END)
- DON'T KNOW..... -8 (END)

IF YES OR DON'T KNOW, **STOP**. SUBJECT INELIGIBLE FOR BIOIMPEDANCE

If you have not recently done so, I would like you to use the bathroom before we take this measurement. For this measurement, you will need to remove metal jewelry and your right sock and shoe. Two sticky pads called electrodes will be placed on your right hand at the wrist and knuckles and two more will be placed on your right foot at the toes and ankle. Once the electrodes are attached, it will take less than one minute for the equipment to measure your body composition.

Before we begin the bioimpedance measurement I need to ask you a few questions that will help us interpret the results.

B2. Have you exercised intensely for at least half an hour or taken a sauna within the last 12 hours? That is, since ___ : ___ a.m. / p.m.?

EXER12H7

- NO.....1
- YES.....2
- REFUSED.....-7

B3. Have you had anything to eat or drink, apart from water, in the last 5 hours? That is, since ___ : ___ a.m. / p.m.?

EAT5HR7

- NO.....1
- YES.....2
- REFUSED.....-7

B4. Have you had more than 2 alcohol drinks in the last 24 hours? That is, since ___ : ___ a.m. / p.m.?

ALCO24H7

- NO.....1
- YES.....2
- REFUSED.....-7

B5. Do you have any embedded medical devices, metal pins or plates, clips or beads used to treat cancer, braces, staples from surgery or any other type of embedded metal? **EMBDDEV7**

- NO.....1
- YES.....2
- DON'T KNOW.....-8

Please remove all metal jewelry. Although you won't feel anything, metal removal is encouraged for more accurate results. Now please remove your right shoe and sock before lying down on a table for the test.

METJEWL7

B6. DID PARTICIPANT WEAR ANY METAL JEWELRY DURING MEASUREMENT?

NO.....1 **(B7)**
YES.....2

B6.1. IF YES, WERE THERE ANY RINGS, BRACELETS, WATCHES OR ANKLE JEWELRY ON THE MEASURED SIDE? **ONMEASS7**

NO.....1
YES.....2

LEGS SHOULD BE FAR ENOUGH APART SO THAT THE THIGHS DO NOT TOUCH. HANDS AND ARMS SHOULD BE FAR ENOUGH APART SO THAT THE HANDS AND ARMS DON'T TOUCH THE TORSO.

IF THE SKIN IS OILY, CLEAN IT WITH AN ALCOHOL SWAB BEFORE ATTACHING ELECTRODES.

IF THE SKIN IS DRY, APPLY A SMALL AMOUNT OF ECG OR CONDUCTIVE PASTE BEFORE ATTACHING ELECTRODES.

B7. ON WHICH SIDE OF THE BODY WERE THE ELECTRODES PLACED? **SIDE7**

RIGHT1
LEFT2

THE **VALID RANGE** FOR THE CONDUCTANCE VALUE IS **-800 TO 800 OHMS**. THE VALID RANGE FOR THE REACTANCE VALUE IS **-150 TO 150 OHMS**. IF AN '*OUT OF RANGE*' CONDUCTANCE OR REACTANCE OR *NEGATIVE* CONDUCTANCE VALUE IS DETECTED PLEASE SEE INSTRUCTIONS ON THE NEXT PAGE.

B8. RECORD THE CONDUCTANCE / RESISTANCE VALUE THAT APPEARS ON THE IMPEDANCE METER:

(+ OR -) **CONDRAW7 / CONDERZ7** _____ OHMS

B9. RECORD THE REACTANCE / IMPEDANCE VALUE THAT APPEARS ON THE IMPEDANCE METER:

(+ OR -) **IMPERAW7 / IMPEFRZ7** _____ OHMS

B10. WAS THE MEASUREMENT RE-RUN? **BIORRUN7**

NO.....1
YES.....2

B11. COMMENTS: _____

REMOVE AND DISPOSE OF THE ELECTRODES, BE SURE NOT TO INJURE THE SUBJECT’S SKIN.
IF YOU HAVEN’T ALREADY DONE SO, COMPLETE QUESTION A10 = “YES (2).”

Thank you for your participation in this study.

IF AN **‘OUT OF RANGE’** CONDUCTANCE OR REACTANCE IS DETECTED, IMMEDIATELY CHECK THE QUALITY OF THE ATTACHMENT OF THE ALLIGATOR CLAMPS AND THE SECURITY OF THE ELECTRODES TO THE SKIN. THEN, RE-DO THE PROCEDURE.

IF THE *SECOND* MEASUREMENT FALLS WITHIN THE VALID RANGE, IT SHOULD BE ENTERED INTO THE FIELD FOR Q.B8 OR Q.B9. THE *INITIAL* MEASUREMENT SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED “2=YES” RE-RUN.

IF THE SECOND ATTEMPT ALSO RESULTS IN AN INVALID RANGE, THEN VALIDATE WITH 500 OHM RESISTOR AND RE-RUN A THIRD ATTEMPT. IF THE *THIRD* MEASUREMENT FALLS WITHIN THE VALID RANGE, IT SHOULD BE ENTERED INTO THE FIELD FOR Q.B8 OR Q.B9. IF *THIRD* ATTEMPT VALUES ARE STILL INVALID, CODE “-2222” INSTEAD OF OUT OF RANGE VALUE. THE *INITIAL* AND *SECOND* MEASUREMENTS SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED “2=YES” RE-RUN.

THE ABOVE PROCEDURES SHOULD ALSO BE FOLLOWED IF A **VALID BUT NEGATIVE** VALUE (BETWEEN -1 AND -800) IS DETECTED FOR CONDUCTANCE (Q.B8). IF THE SECOND OR THIRD CONDUCTANCE MEASUREMENT RESULTS IN A POSITIVE VALUE, IT SHOULD BE ENTERED INTO Q.B8 AND THE INITIAL MEASUREMENT(S) SHOULD BE RECORDED IN THE COMMENTS (Q.B11) AND Q.B10 SHOULD BE CODED “2=YES” RE-RUN. IF ALL THREE MEASUREMENTS RESULT IN A NEGATIVE VALUE, THEN THE FINAL VALID MEASUREMENT (BETWEEN -1 AND -800) SHOULD BE ENTERED INTO Q.B8.

<u>E2AVE7*</u>	Estradiol (see important note below)	pg/mL
<u>FSH7</u>	Follicle-stimulating hormone	mIU/mL
<u>SHBG7</u>	Sex hormone-binding globulin	nM
<u>T7</u>	Testosterone	ng/dL

*** IMPORTANT NOTE:** There were originally two estradiol result variables because estradiol was run in duplicate. E2AVE2 is the within-person arithmetic average of the two estradiol variables.

2. Flags and other variables

<i>Variable</i>	<i>Meaning</i>	<i>Codes</i>
<u>CYCDAY7</u>	Day of cycle	n/a
<u>FLGCV7</u>	Both Estradiol results are > 20 pg/mL and the within-subject coefficient of variation (CV) is > 15%.	0=no, 1=yes
<u>FLGDIF7</u>	One or both Estradiol results ≤ 20 pg/mL and the difference between them is > 10 pg/mL. Note: Differences were found between some of the Estradiol duplicate measurements. The following guidelines were decided upon: <ol style="list-style-type: none"> 1. If both E2 values > 20 pg/ml, CV must be ≤ 15%. 2. If one or both E2 ≤ 20 pg/ml, the two E2 results must agree within 10 pg/ml. <p>DATA WITH THESE FLAGS SHOULD BE OMITTED FROM DATA ANALYSES, OR USED WITH CAUTION IF INCLUDED IN ANALYSES.</p>

<i>Variable</i>	<i>Meaning</i>	<i>Codes</i>
<u>FLAGSER7</u>	Flag to indicate that lipids were measured on serum rather than plasma because plasma was not available. Lipids for these subjects were <u>not</u> set to missing.	0=no, 1=yes

*1=yes means flagged

3. *Changes to the data:*

- Non-fasting Triglycerides, Insulin, & Glucose - If women were not fasting, triglycerides, insulin and glucose were set to missing in the frozen data set because these assays are not valid for non-fasting samples.
- Estimated vs. Direct LDL. LDL is estimated using the Friedewald equation for all women with triglycerides below 400 mg/dl. If triglycerides exceed 400 mg/dl, LDL is set to missing.
- Serum lipids. A few subjects had their lipids measured from serum rather than plasma. The results were left as is but subjects were flagged (FLAGSER1=1).
